### ABOUT PIT BULL TIRES:

Pit Bull Tire Company was founded in 1994 as the motorsports development division of Tire Mart, Inc., a 65+ year old stalwart in the tire industry.

Tire Mart has been involved in the development of new technologies for more than half a century and Pit Bull Tires is simply an extension of our commitment to innovation, quality and integrity.

Since its inception, Pit Bull Tires has been nothing short of a phenomenon. With a name like "Pit Bull", we knew we had a lot to live up to and we do our best to provide our customers with incredible products and exceptional service. We are down-to-Earth and pride ourselves on being accessible to our customers.

Our parent company has been in the same family for almost 70 years and because we are an American family-owned business, we do our best to have all of our Pit Bull products made here in the United States. We believe that as long as we provide first quality products and back them up with top-notch customer service, we will continue to build on the success that we have been fortunate enough to experience. We are truly grateful to all of you who have supported us over the years. It is our quest to pursue new ideas and concepts and make them a reality. Thank you to our customers and friends who allow us to do what we love to do.

Now you know something about us.

Pit Bull Bias Tires LTBIAS

**TEAR IT UP!**

MEET THE THREE NEW MEMBERS OF THE DOG PACK!!! 4x4 LT Bias Tires designed for true off-road fanatics who like to Tear It Up<sup>®</sup>. Pit Bull Tires kick ass... Period! Don't believe us... REALLY... Don't. We're not going to tell all our secrets so our competition won't find out why our tires work so well. Pit Bull Tires<sup>®</sup> have many distinguishing features that are proprietary. Our tires bite hard, flex, make less noise and as extreme off-road bias tires they offer a nice ride on the road when compared to other off-road bias tires. You've heard this all before in other tire manufacturer's ads, so like we said... don't believe us.

# RADIAL XOR

# ATV/UTV

EXTREME OFF-ROAD RADIAL LINE

### ROCKER<sup>®</sup> UBER<sup>™</sup> XOR<sup>™</sup> ATV/UTV RADIALS:

- Patented Tread Design**  
Based on our Baja proven and multiple motorsport Champion Rocker extreme off-road LT tires. We're not new to this extreme tire thing.
- Multi-varied Patented Tread Blocks**  
Create an alternating biting pattern for maximum traction, cleanout and stability.
- Rounded Edge Tread Blocks**  
Help reduce tire wear and noise.
- Stepped Lugs**  
Aid in lateral traction and stability. We've been using stepped lugs on our designs since 2002.
- Extra Deep Rim guards (ExD<sup>™</sup>)**  
Incorporated because that's what we do...add the extras that help make off-roading hassle free.
- Gradual Sloping Divots on Lugs**  
Increase biting edges and reduce tire weight without sacrificing traction.
- Cool Sidewall Designs**  
Different styling on either side and other Tire Tattoos<sup>™</sup>.

### GROWLER<sup>®</sup> XOR<sup>™</sup> & GROWLER<sup>®</sup> UBER<sup>™</sup> XOR<sup>™</sup> ATV/UTV RADIALS:

- 6 Circumferential Groove Channels**  
When you're going in the muck, you don't want it to stick to the tires!
- Aesthetically Directional yet Functionally Non-Directional**  
Looks can be deceiving. There are biting edges for forward/reverse and lateral traction all over the tire. At the same time, the overall impression is that of a directional tire and the Growler<sup>®</sup> XOR<sup>™</sup> ATV/UTV acts like a dedicated directional and throw some serious muck!
- 8 ply-Rating**  
To Maximize strength and minimize weight.
- UBER<sup>™</sup> 8 ply-Rating w/ EXD<sup>™</sup>**  
For more UTV load capacity in the toughest applications.
- Tear It Up<sup>®</sup> Rubber Compound**  
The same rubber we use on our extreme LT tires that have proven themselves time and again on some of the most powerful rigs and extreme conditions on Earth!
- Over-The-shoulder Lugs**  
Designed using our Fang<sup>®</sup> Technology that wrap down the sidewall and add extra strength and traction to the shoulder and sidewall areas. Our Pit Bull Extreme Team<sup>™</sup> designs with a purpose, and one benefit of our staggered over-the-shoulder lugs is to help reduce excessive drag.
- Integrated Sidewall Protectors**  
Sidewall bands of rubber that can take the brunt of many impacts to help protect the sidewall and rims.
- Serious Siping**  
Increases biting edges and traction. Our design helps prevent foreign material buildup on the tire surface... where you don't want to create a slick.
- Stone Kickers**  
Help wiggle out foreign material buildup.
- High Void Treads**  
For easy cleanout and increased traction.
